

# Blog

---

## CSS

---

---

TailWindcss+styled-component

## JS

---

---

react

尽量克制自己用组件库，用原生的react实现功能

- 数据交互：react-query
- 状态管理：zustand

## markdown渲染

markdown-it

## 评论托管

disqus

yarn add marked --save

yarn add

## learn

去掉原生样式

```
<textarea style={{width: "100%", height:
"100px",borderRadius:"8px",border:"0",outline:"none"}} onChange={(e) => {
    console.log(e.target.value);
}}
placeholder='请评论' />
```

outline:none

antd可以配置主题色

切换主题色
